Alfred Witte

Alfred Witte was an outstanding German astrologer of the early 20th century and the founder of the Hamburg School of Astrology who wrote over 40 articles as well as the first "Rules for Planetary Pictures" . He was also a land-surveyor who worked on the Hamburg airport. In his private life he was an unpretentious, withdrawn man. He was married and had two daughters.

Witte began his career as an astrologer in 1913 when he published his article "Thoughts on Colour, Number, Tone" , where he developed the ideas of Johannes Kepler, his compatriot, an astrologer and mathematician, particularly on the idea of harmony or the music of the spheres. This article discussed the mutual interrelation of planets' vibrations, as well as their relation to other natural oscillations and waves according to the tuning fork principle.

Birth : 2 March 1878 at 21:12 LMT Hamburg, Germany.

Died : 4 August 1941 at 4:01 (MEDT) in Hamburg, Germany.

We examine  /  ,  /  and  /  connections. When it is a royal wedding, we also examine  connections.

Used :

1- 23°45'56" for Year 2000. Speed of precession is 50.2388475. Mean Node.

2-Progression Key :

Secondary Progression : 1 sidereal day = 1 sidereal year

3- Last moon phase before the event as transit.

Each moon phase as a radix shows for a place and for a country, what will happen until the next moon phase. For the event time you can also calculate the progressions.

Each moon phase as a transit shows for a person what will happen for that person until the next moon phase.

The moon phases that are taken are : New Moon, First Quarter, Full Moon and Last Quarter.

The moon phase that we take is the last moon phase before the event.

4- Transit, secondary progression and solar return.

5-Harmonics : Harmonic 256

Zet Settings :
